

About

As an artist, I got an eye for an aesthetic, intuitive sense of color, and well-balanced composition. Motivated by curiosity I decided to switch to digital art and UI specific. I'm ready to apply all my knowledge to make a strong cohesive interface based on user's experience and make a positive impact on people's lives, to make digital products easier and more intuitive to use.

Hello, I'm Viktoriia and I'm UX/UI designer with a background in fine art and illustrations, also I'm a co-founder of kid's art studio "Art is fun" in Chicago city. Amazing experience working with people of different ages brought me organizational skills, good time management, and problem-solving tenor.

When I'm not designing I like to travel. One of my little-big goals visit all 50 states in the US and start exploring the world! By the way, I've been to 13 states already! As my job requires a lot of work with a computer on my days off I prefer to do as many activities outside as I can: hiking, swimming, dancing, and snorkeling. Catch me anywhere but home!
